H-ISAC Membership pays for itself...

BiMeta suite – A customizable set of algorithms that scans on-line sources for stolen user credentials, domain name spoofing, stolen intellectual property and more.

Join **H-ISAC's Community** to extend your security team and improve your ability to mitigate against threats and vulnerabilities.

Members receive these alerts as part of their membership, saving hundreds of thousands in security services:

- 💡 Alert for similar looking domain names
- 💡 Alert for leaked credential detection
- 💡 Alert for keyword detection in Pastebin, Darknet markets, etc
- 💡 Alert for accidentally exposed data from sources including cloud, third party and managed service providers

**Sharing threat intelligence and
best practices with each other**

In the words of our members...

A member describes the H-ISAC **Threat Intelligence Committee (TIC)**:
"We use intel gained from TIC research to create Pre-Incident Response to run in a pre-imminent danger mode to build resiliency."

"**H-ISAC is the best intelligence we have...** members help each other monitor the moving and shifting of the adversary."

"Membership provides access to cross-organizational conversations between providers and medical device manufacturers."

OVER 4,000
Global Analysts

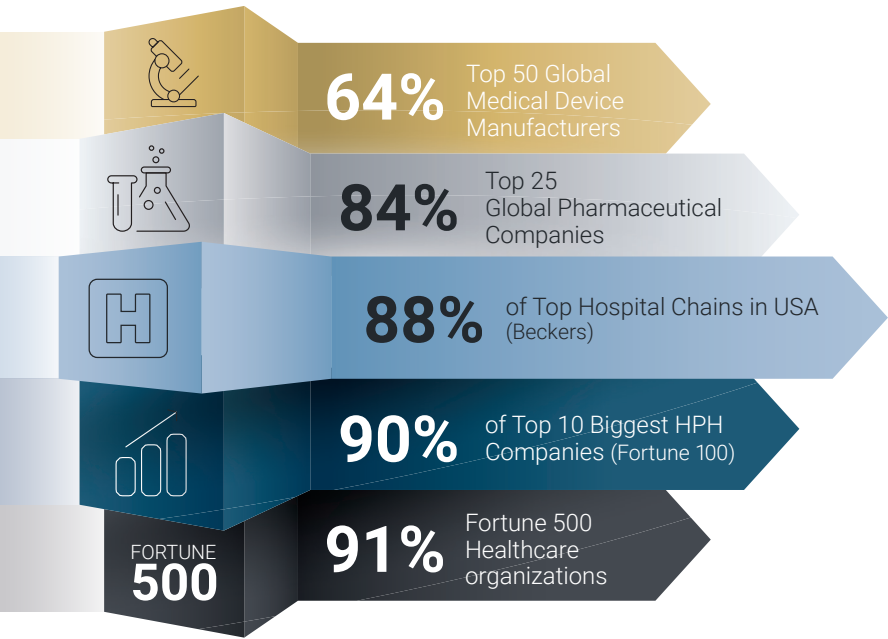

Members of the H-ISAC community
receive access to the collective intelligence
of thousands of global analysts
