H-ISAC Board Elections

This year’s Health-ISAC Board election nominations are now closed. Ballots will open for voting in early October. As mentioned in last month’s newsletter, the POC from each member organization will vote on the proposed slate of candidates prepared by the Nominating Committee and approved by the Board.

Board Elections are an opportunity to step forward and make a difference. Serving on the Health-ISAC Board is a position to be an advocate for security maturity both within your own organization and for the global health and public health critical infrastructure. Board members can provide opportunities and circumstances that take down barriers and make it easier to collaborate and share for the benefit of all organizations within the healthcare sector and the patients they serve.

Prepare Now for Next Year’s Elections

The best way to become eligible as a Board candidate is to raise your hand and get involved. H-ISAC seeks senior leadership members who participate in working groups, attend and present at H-ISAC Summits and workshops, contribute to the shared data, and respond to member questions on our communication platforms. Each Board member is comprised of a plethora of different work experiences and contributes a vital service to the H-ISAC community.
Call to Aid Development of Actionable Best Practices for Healthcare Subsectors

Many H-ISAC members are involved with the Health Sector Coordinating Council (HSCC), a U.S. federal advisory committee established to work collectively with the government to address policy and strategic challenges shared across all 6 of the critical healthcare subsectors – Direct Patient Care; Health Information Technology; Health Plans & Payers; Labs, Blood & Pharmaceuticals, Mass Fatality Management Services; and Medical Materials. H-ISAC and HSCC are considered complementary functions for critical infrastructure protection – H-ISAC for tactical and operational preparedness and response, and HSCC for longer-term strategic and policy thinking.

Actionable best practices and recommendations are continually being developed by the HSCC Joint Cybersecurity Working Group (JCWG) to improve the security and resiliency of the sector. The success of on-going projects is defined by the time and human capital an organization is willing to commit. The JCWG has produced 10 guidance documents and 5 policy letters in the past 18 months (https://healthsectorcouncil.org/hscc-recommendations/) with several more in the pipeline for publication before the end of the year.

Please participate in this important responsibility. For more information about task group objectives and membership expectations, please request information within https://HealthSectorCouncil.org/contact/.

SHAPE H-ISAC MEMBER SERVICE OFFERINGS

H-ISAC Products & Services Satisfaction Survey
H-ISAC is currently asking for input regarding current services. Please take the 2020 P&S Satisfaction Survey at https://www.surveymonkey.com/r/PSSat20. Additionally, if you are interested in new products or services for education, medical device security, or third-party risk, please take the appropriate survey on the H-ISAC Portal.
