HEALTH-ISAC HYBRID SPRING SUMMIT

## Health-ISAC Hybrid Spring Summit Start Your Unique Event Experience Today!

### “Secured in Paradise” May 18-20, 2021

Secured in Paradise Hybrid Summit officially kicks off May 3<sup>rd</sup> with on-demand sessions and opportunities to network with other attendees and partnering with sponsors. Be among top healthcare attendees from around the globe. Registration remains open until May 17<sup>th</sup>.

**View the full agenda** <https://cvent.me/eXbe3G>

**Platform Demo Video** <https://youtu.be/F9717QNBXb8>

**Register** <https://h-isac.org/summits/secured-in-paradise-spring-2021-summit/>

### Real-time Translation

Each session will have live AI translation in 15+ languages. You and your global colleagues can gather virtually for high-powered networking and robust educational opportunities.

Don't miss this chance to connect with the Health-ISAC Community.

**Confirm your registration and complete these simple steps to maximize your Summit experience.**

**Complete Your Profile**

**Build Your Agenda**

**Visit Exhibitors**

**Start Networking**

**Make sure to book your hotel as the group rate ends this Wednesday, May 5th.**

## STRATEGIC WHITEPAPER FROM THE TOC

### Strategic Threat Intelligence: Preparing for the Next “SolarWinds” Event

[Whitepaper Download](#)

Health-ISAC, in cooperation with the American Hospital Association, has published **Strategic Threat Intelligence: Preparing for the Next “SolarWinds” Event**. This report focuses on the key characteristics contributing to many enterprise network compromises, including the recent SolarWinds Orion incident.

The paper is meant for all audiences, non-technical and technical, as it presents strategic level decision elements that senior leaders including **C-Suite Executives** can use to help understand the risks involved with certain enterprise IT systems in their network environment. The intelligence also provides **detailed technical analysis** and recommendations for IT and information security teams to help address immediate concerns by providing tactical mitigations and recommendations. For our technical audience, this paper presents a detailed analysis of characteristics that allowed the SolarWinds incident to affect multiple industries, organizations, and systems. The ability to extract the characteristics and features of SolarWinds could allow organizations to predict and hopefully prevent the next “SolarWinds”-like event in their enterprise environments.

## HEALTH-ISAC COMMUNITY SERVICES

### NEW SHARED SERVICE FOR MEMBERS—CYWARE

Health-ISAC recently partnered with Cyware to add their suite of Virtual Cyber Fusion solutions as a security resource for members. *As part of H-ISAC's Shared Services Program, the Cyware offering also provides qualifying members a 5-10% discount on services.*

Cyware's solutions combine intelligence collection and sharing, threat detection, analysis, and automated actioning to enhance an organization's defense posture and accelerate response to cyber threats. Organizations of all sizes are given the ability to leverage threat intelligence automation, threat response, and security orchestration capabilities to quickly prioritize and take action on the intelligence that is most critical to them.

Learn more here: <https://h-isac.org/cyware-offer/>

Watch our recorded webinar on this new service. Find the April 20th webinar entitled *Managing and Actioning Your Threat Intelligence* in the Member Portal.

### WORKING GROUP SPOTLIGHT

The Governance and Policy Working Group recently released a white paper!

Learn about recommendations for a minimum set of security controls and process tasks to protect Personal Identifiable Information (PII) in this newly released Health-ISAC working group whitepaper entitled *Security Implementation of Privacy Regulation*.

Download whitepaper here:

<https://h-isac.org/security-implementation-of-privacy-regulation/>

This paper addresses the intent of local and global privacy laws and regulations.
