Registration to Gateway to Security is open! Join us in Dubrovnik, Croatia October 17-19

Come to draw on the experiences of a multitude of organizations globally to collaborate for resilience in healthcare.

Listen to what previous European Summit attendees are saying...
- Sessions and networking - event was fabulous!
- Great learning experience
- Good platform to connect and share experiences.

Early Bird registration is US $200 - through September 15! Register at https://cvent.me/4bX9Gl

The Deadline is Approaching to Share S’more with your Peers. Call for Papers closes July 14th.

Prepare for one of the greatest campfire stories on the range. Keynote speaker Shawnee Delaney will share her tales of espionage and cybersecurity, including tips to know when you are being recruited and how to respond if you are approached.

Registration opens August 21st with a SummitPalooza one-day only sale!

Improving Medical Device Security by Moving from Shared to Defined Responsibility

5 Key Takeaways:
1. Define task responsibilities among stakeholders to reduce the overall risk of failure.
2. Develop a responsibility assignment matrix to help define task obligations for all parties supporting medical devices.
3. Gain an understanding of the responsibility distribution in operating software solutions through “black box” medical devices to cloud service.
4. Learn about procedures to identify necessary tasks and assign those tasks to responsible parties, set up a RACI matrix, and keep it updated with a continuous improvement cycle.
5. Find a RACI matrix template to define responsibilities for operational use.

Finite State has become a Community Service Provider!

Finite State offers to all Member Organizations

Free SBOM + Firmware Risk Assessment for (3) products.

Finite State helps organizations reduce risk around application and product security across the software supply chain. They provide SBOM generation, ingestion, and extended SBOM management.

Learn more here: https://h-isac.org/finite-state/

NIS2 Implementation Working Group

This new group is for organizations doing business in the EU. The Group will collaborate on the NIS2 directive coming to the EU. The goal is to develop and coordinate the approaches for each country and implement it on a company level.

Interested members should sign up on the Member Portal, reach out to the Member Engagement Specialist, or email contact@h-isac.org for support.

Ever wondered what attending a workshop is like?
